**ABOUT THE BATCH**

The 2019 batch had ten captains and ten assi. captains. The batch had a total twenty members to control and maintain the rule regulation in school premises. The batch had creative minds as well as a well performers' team. As the 2019 batch was the first batch of the house system everything was kind of a mess. Gradually, captains understood the way of working. In this very first batch, the house system had organized various activities to learn and teach students new things. Captains were able to convey their messages as well as teachings to students. The batch had organized games too to encourage students to participate in different activities.

***Alteration of assi. captains cause no data mentioned.***
